**FINANCIAL AND COMMERCIAL**

MARKET SHOWS FIRMER TREND.

New York, June 30.—Belief that monetary conditions are likely to improve within the next six months and reports that several European governments contemplate early reduction of their obligations to this country gave a degree of stability to the stock market today.

Conservative brokers and commission houses, for the first time in several weeks, sounded a note of encouragement, supporting their change of attitude with liberal purchases of selected stocks.

Equipment and steel were most favored. Oil, motor chemicals and shippers also advanced, together with various specialties, at extreme gains of 1 to 3 points. Italy trailed lower, and utilities as represented by the express companies made the most substantial advances.

Profit taking and the steady advance of call loans from their opening rate of 9 per cent, to 15 per cent, just before the finish served to reduce many gains in other proportions. Sales amounted to 325,000 shares.

In addition to the higher rate for call money, which equalled the maximum quotation of recent months, a factor trend was noted in the market for time funds. Many mid-year maturities were renewed at 8 1/2 to 9 3/4 per cent, but accommodations for longer dates were exceedingly scarce. Railroad, utility and industrial bonds eased variably but liberty and international issues were steady on smaller dealings. Total sales par value, were \$115,000,000. Old U. S. bonds were unchanged on call.
